EDUCATION

Diploma, Computer Science

Seneca Polytechnic

Toronto, ON
September 2023 – April 2026

BSc (Hons), Computer Science – Software Engineering Major

University of Hertfordshire

London, UK
September 2021 – December 2025

PROFESSIONAL EXPERIENCE

Software Developer 1

Best Buy Canada

Toronto, ON – Remote
June 2026 – Present

- Contribute to modernization of a **20-year-old legacy returns and repairs system** supporting 300+ stores and 10,000+ employees through scalable backend services and distributed integrations.
- Develop and maintain **Java/Spring Boot** microservices and REST APIs across 20+ core integrations, implementing business logic, data transformation, validation, and payload processing.
- Build and troubleshoot event-driven data flows using **Azure Service Bus, RabbitMQ, and legacy databases**, implementing retry mechanisms and integration validation for reliable distributed communication.
- Develop unit and regression tests, debug service and API failures, and validate end-to-end workflows across development, QA, release and production environments using **Maven, Docker, and OpenShift**.
- Translate architecture diagrams, technical requirements, business rules, and acceptance criteria into production implementations while collaborating with senior engineers, QA, DevOps, product, and business teams.

Software Engineer (Co-op)

VDart — AI & Data Team

GA, USA – Remote
September 2024 – August 2025

- Developed and supported backend services and API integrations using **Python, Flask, FastAPI, and React**, applying object-oriented design and testing practices across AI and data workflows.
- Designed and maintained backend **MongoDB data systems** supporting 1,000+ records, implementing efficient querying, modular data handling, and validation to maintain system integrity.
- Investigated and resolved **API and service-level issues** using **Postman, SQL queries, and backend debugging techniques**, improving system accuracy, reliability, and response handling.

IT Systems Analyst

Anthony & Associates PC – Barristers and Solicitors

Toronto, ON
January 2025 – April 2025

- Acted as primary contact for IT operations and system-related issues, supporting 20+ professionals with access control, troubleshooting, and **production issue resolution**.
- Performed root cause analysis and implemented fixes for recurring technical issues, improving system stability, reliability, and operational workflows.

Software Developer

The Wing Spot

Toronto, ON
October 2023 – September 2024

- Developed and deployed a web-based food ordering application using **JavaScript** and **React.js**, implementing **backend-integrated logic and data validation workflows** to fix functional inconsistencies.
- Built Power BI dashboards with Python-based data pipelines to monitor inventory, sales, profit, and operational KPIs, enabling accurate data-driven business decisions.

SOFTWARE ENGINEERING PROJECTS

Java-based Consultation Management System [↗](#)

Developed a modular Java application using Swing and JavaFX for appointment and record management, implementing business logic, data validation, and maintainable object-oriented architecture.

Minute-Mail – Email Writing Bot [↗](#)

Developed an automated full-stack application using Python, Flask, JavaScript, SQL, and LLM APIs, implementing API integrations and validation workflows to automate email generation.

TECHNICAL SKILLS

- Languages:** Java, Python, JavaScript, SQL, C, C++
- Backend Engineering:** Spring Boot, REST APIs, Microservices, Event-Driven Architecture, Domain-Driven Design, Distributed Systems, RabbitMQ, Azure Service Bus, API Integration, Unit/Regression Testing, DSA, Agile/Scrum
- Databases:** MySQL, PostgreSQL, MongoDB
- Cloud & Tools:** Azure, AWS, Docker, Kubernetes, OpenShift, Linux, CI/CD, Git, Maven, Postman, Jira, Miro, Power BI
